Native Broad-Leaved
EVERGREENS

FOR IMMEDIATE EFFECT

And Many Other Specialties for Fall and Spring Planting

Kalmia latifolia

Exceptional Quotations on Large Lists Submitted. My supply and facilities are unequaled and backed up by 35 years' constant experience growing and handling Hardy Native Ornamentals which should recommend the favor of your order

GARDENS OF THE BLUE RIDGE

E. C. ROBBINS

Ornamental Nurseryman

ASHFORD, McDowell County

NORTH CAROLINA

MEMBER AMERICAN ASSOCIATION OF NURSERYMEN

The celebrated Blue Ridge Mountains, near Ashford, N. C.

Note to Customers

NEW LOCATION

Is in the heart of the Blue Ridge Mountains, "the most beautiful mountain region in the continent," in western North Carolina, nearly 4,000 feet above sea-level. My new and permanent headquarters is Ashford, McDowell County, North Carolina, on the scenic Clinchfield Railroad.

All offers of stock are made subject to conditions beyond my control

PACKING AND GRADING

Will be done in the most careful way. Boxing included and burlapping at cost where not stated. Certificate of Inspection attached to all shipments.

QUOTATIONS

This list cancels all previous offers. Please do not order from old catalogues.

REMITTANCE OR REFERENCE

Should accompany orders from unknown correspondents. Discount of 5 per cent on cash orders. All bills due and payable 30 days from date of invoice. Interest charged after 30 days.

SHIPPING INSTRUCTIONS

Should always be given fully, unless you prefer to leave to our best judgment. In this we assume no risk, our responsibility ceasing upon receipt of signed bill of lading by forwarders. All claims for damages in transit must be handled by consignee.

CLAIMS

All claims for errors must be reported upon receipt of goods and will be rectified promptly. Unless this is done we can accept no responsibility of any kind.

No GUARANTEE is made that stock will grow, whether planted by us or not. As we have no control over after-treatment or weather conditions, the purchaser must assume all risks after stock leaves our Nursery in good condition.

In no case shall we be held for damage exceeding original purchase price and only to this extent when proper proof is furnished that stock has been wrongly labeled.

All orders are accepted and filled on these terms, unless otherwise agreed

FALL SHIPPING SEASON begins late in August and extends usually till about December 1, according to weather conditions.

SPRING SHIPMENTS are forwarded according to customers' wishes and subject to conditions beyond our control, March 1 to May 15. PLEASE ORDER EARLY.

Azalea calendulacea. See page 3

Hardy Native Deciduous Trees and Shrubs

Cultural Directions for Azaleas, Broad-Leaved Evergreens, and Similar Plants

Azaleas, Kalmias, Leucothoe, Pieris, and Rhododendrons are acid-soil plants and will not succeed well in limestone soils. A deep, porous soil is essential. The ground should be excavated to a depth of about 2 feet, working in leaf-mold, humus, or well-rotted stable manure. This mixture must be worked in carefully and packed tight around the roots. Fill in the excavation with rotted sods, muck or peat soil, mixed with a small quantity of sand.

The plants should be set the same depth as in the nursery, which is shown by the earth-line near the base. After planting, mulch with several inches of leaves or light litter, allowing this mulch to remain around the plants, and renew it annually in the autumn. A thin covering of rich soil may be used to an advantage in holding mulch in place and to assist in decomposition. The mulch also tends to keep the soil cool in summer and protects against freezing in winter. If these simple instructions are observed, your planting of Broad-leaved Evergreens will be entirely successful.

For use in beds of Rhododendrons, Azaleas, and other similar plants we recommend the following: Galax, Shortia, Ferns, Orchids, Lilies, Trilliums, Cimicifugas, Iris, Polygonatum, Sanguinaria, and most of our other perennials.

ACER dasycarpum. Silver Maple. Rapid-growing, Each	10	100	1,000

Foundation Planting of Ferns

Hardy Native Ferns

For shady locations, no class of plants can equal the Ferns. They are easily grown in ordinary soils and will often thrive where it is impossible to make flowering plants succeed. We handle large quantities of Ferns annually and recommend the following:

ADIANTUM pedatum. American Maidenhair Fern. Each	10	100	1,000
Deciduous. One of the most distinct and beautiful. Strong established plants.....	\$1 50	\$13 50	\$127 50
ASPLENIUM angustifolium.			
Strong plants.....	2 50	22 50	
ATHYRIUM filixfemina. Lady Fern. Large, deciduous Fern. Exceedingly showy.			
Strong plants.....	1 50	13 50	127 50
thelypteroides. Silvery Spleenwort.			
Strong plants.....	2 50	22 50	
BOTRYCHIUM virginianum. Rattlesnake Fern.			
Deciduous. Triangular fronds, deeply cut. Showy. Strong plants.....	1 50	13 50	127 50
DICKSONIA punctilobula. Hay-scented Fern. A very handsome vigorous-growing deciduous species. Recommended for shade or open locations. Widely distributed.			
Extra-strong clumpy plants.....	1 50	13 50	127 50
DRYOPTERIS goldiana. Goldie Fern.			
Strong plants.....	2 50	22 50	
hexagonoptera. Winged Woodfern. Deciduous. Broad, triangular fronds.			
Strong plants.....	1 50	13 50	127 50
marginalis. Leather Woodfern. Robust, evergreen showy species.			
Extra-strong stocky plants.....	1 50	13 50	127 50
spinulosa. Toothed Woodfern. Evergreen.			
Strong established plants.....	1 50	13 50	127 50
ONOCLEA sensibilis. Sensitive Fern. Deciduous. Suitable for dry or moist locations.			
Strong established plants.....	1 50	13 50	127 50

Extra-strong plants.....	2 50	22 50	212 50

Leaf-Mold

Leaf-mold is nature's fertilizer. It is better than manure for potted plants and flower-beds. Mix one-third leaf-mold with two-thirds garden loam for best results.

Especially recommended for native Azaleas, Broad-leaved Evergreens, and, in fact, all ericaceous plants.

Leaf-mold improves the physical condition of the soil and aids the germination of seeds.

100-lb. bags \$2.50, 50-lbs. \$1.75; \$12.50 per ton in carloads; \$15 per ton in bags

Special Collection No. 1

Plants for Shady Places

Along the border of an evergreen group, or at the edge of a woodland, these plants are of great value. Foliage and flowers are charming from early spring until late autumn.

Dioscorea villosa. Yam. In autumn the heart-shaped foliage turns to golden yellow.

Galax aphylla. Galax. A superb ground-cover plant. Foliage bronze and green.

Shortia galacifolia. Oconee Bells. Flowers pink and white, in early spring.

Veratrum viride. American False Hellebore. Greenish white flowers in spring. Height 2 to 4 feet.

Cypripedium pubescens. Common Lady's Slipper. Bright yellow flowers in May. Height 12 to 20 inches.

Arisæma triphyllum. Jack-in-the-pulpit. Greenish white flowers, top turning over the club-shaped spadix or center spikes.

Trillium grandiflorum. Snow Trillium. Large white flowers turning to pink.

Aconitum uncinatum. Clambering Monks-hood. Blue hood-shaped flowers.

Cimicifuga racemosa. Cohosh Bugbane. White flowers in late summer. Height 4 to 8 feet.

Clintonia borealis. Bluebead. Showy yellow flowers in June. Height 6 to 8 inches.

Hepatica acutiloba. Sharp-lobe Hepatica. Many white and purple flowers in March and April.

Polygonatum commutatum. Great Solomon's Seal. Drooping greenish white flowers in June. Height 3 to 6 feet.

Five plants of each variety (60 plants in all) for only \$10

Hardy Native Herbaceous Perennials

This list contains a variety of Herbaceous Plants furnishing a succession of bloom from early spring to late autumn, all having been tried out with success in cultivation. The height indicates the approximate height of each plant as found in wild state. The time of blooming naturally depends on locality.

ACONITUM uncinatum. Clambering Monkshood. Height 3 to 6 feet. Blue, hood-shaped flowers.	10	100	1,000
Strong established plants.....	\$1 75	\$15 00	\$125 00

Lilium carolinianum

A showy Lily somewhat dwarfer than *L. superbum*, with flowers a little lighter in color, but enriched with a delicate and pervasive fragrance. It grows 2 to 4 feet high, and, in spite of its common name of Swamp Lily, thrives best in well-drained soil and in partial or even fairly dense shade. Its habit is peculiarly airy and graceful, the petals recurving sharply but not bent back so completely as *L. superbum*, so that the long, slender tips are frequently erect or barely touch each other. See page 24 for description and prices.

Lilium superbum

This is the tallest and most spectacular native Lily. Under favorable conditions it reaches 8 feet, bearing scores of 3 to 4-inch flowers of brilliant orange-scarlet, shaded yellow and dotted and tinged with brown in the center. The petals curve backward sharply, forming a turban-shaped flower which accounts for its common name, the "Turk's-cap Lily." It particularly likes to stick its head up through an opening in over-hanging shrubs. Blooms in July, and is easily adaptable to garden conditions. See page 25 for description and prices.

The bulbs of all Lilies should be planted as early as it is possible to obtain them in autumn. Most of them make root-growth before winter and produce stronger stems and flowers in consequence. It is well to dust all bulbs with flowers of sulphur or some good powdered fungicide before planting, and to make sure that the drainage is perfect. Water standing over or about the bulbs is fatal. Never use any manure in the Lily-bed. Use woods' earth or leaf-mold for fertilizer.

MY SPECIALTIES:
